- Tools & DevOps: Git, GitHub, Gunicorn, Nginx, Celery (Asynchronous Tasks)
- Web Technologies: API Design, Authentication, React, Django Template Engine, Stripe Integration

---

PROJECTS

Zing Fashion (E-commerce Site) | Live Project

- Developed a full-featured backend for a clothing e-commerce platform using Django REST Framework.
- Implemented MongoDB as the primary database for flexible data management.
- Managed the project repository on GitHub.

TechHeaven E-commerce Site | GitHub Link: link

- Built a comprehensive website using Django for backend logic and the Django Template Engine for the frontend.
- Integrated Redis for efficient caching and Celery for handling asynchronous tasks.
- Implemented secure payment processing using the Stripe API.
